

Quality Policy

The management board of **MAVIFAST Srl** conducted an in-depth analysis of the marketplace and assessed the risks related to the production process in order to keep ensuring its Clients reliable products/services.

The management board of **MAVIFAST Srl** devised a strategic plan with the objective to be compliant to quality regulations established by UNI EN ISO 9001:2015 and reach the following goals:

- customer and stakeholders' satisfaction;
- prevention of anomalies and production inefficiencies thanks to risks assessment (risk-based thinking) within the quality management system;
- product/service quality and compliance to current regulations;
- continuous improvement of professional approach, reliability and time to market, thanks to clear quality objectives set during the Management review;
- compliance to current legislation in terms of job, security, privacy, finance and environment;
- human resources development.

The management board of **MAVIFAST Srl** is committed to provide all the assets (people / infrastructure / company environment / monitoring and measurement tools) and information to guarantee the right process and quality control. Specific training addressed to all the employees will raise awareness about the key role of their activities to reach the company goals.

This Quality Policy has been issued as a document, spread and applied within the company, published on the company website and therefore available to the external stakeholders.

Niardo, 11 January 2021
